

AUTOMATIC METALLOGRAPHIC SPECIMEN GRINDING & POLISHING MACHINE

Model **BETAPOL-2000X** Automatic Metallographic specimen grinding and polishing machine is equipped with automatic polishing head and features stepless speed changing and three-level constant speed for grinding and polishing. The working time can be preset and the rotating direction can be controlled. It can finish the whole process of rough grinding, fine grinding, rough polishing and finishing polishing for specimen preparing. It is the necessary metallographic specimen preparing instrument for using in factories, scientific research institutes and laboratories of colleges.

BETAPOL-2000X

FEATURES: -

- Double grinding & polishing discs
- Six pieces Φ 30mm samples can be grinded and polished simultaneously.
- Both grinding disc and polishing head adopt step less speed control, and the rotating direction of grinding disc can be shifted.
- Electric central force holding, fix the sample and then it can complete the whole process of grinding and polishing, and this can ensure the plane parallelism of sample.
- The loading force can be adjusted during running process.
- Working time pre-setting.
- Quick exchanging disc.

TECHNICAL SPECIFICATIONS: -

- Diameter of working disc: 250mm (200mm is optional)
- Rotating speed of working disc: stepless speed changing 50-1000 rpm, and three-level constant speeds of 300 / 600 / 900 rpm
- Rotating speed of polishing head: stepless speed changing 5-100 rpm
- Sample holder: Φ 30mm, 6-hole (or customized)
- Sample preparing time: 60-999 seconds
- Pressure range: 5-170N
- Power supply: Single phase, 220V, 50Hz
- Input power: 700W
- Dimensions: 980 x 920 x 900 mm
- Net weight: 86 Kg
