

METALLOGRAPHY SPECIMEN GRINDING & POLISHING MACHINE

Our **BP-2T** Metallography specimen polishing machine is a kind of double disk table top type polishing machine and can be operated by two persons at the same time. It is suitable for the polishing & grinding of the specimen. The specimen surface turns out to be very smooth with a mirror like finish after polishing and can be used to observe and measure the metallography inspection of specimen under microscope. Fibre Reinforced Plastic (FRP) body makes the machine light weight and easy to be installed for use in laboratories, institutes and quality section of various industries.

BP-2T Series

TECHNICAL SPECIFICATIONS			
Parameter	BP-2T	BP-2T(V)	BP-2T(VD)
Diameter of Polishing Disc	200mm		
Rotating Disc Mode	Fixed	Variable	
Rotating Disc Speed	960 RPM	50-1250 RPM	
Motor Specifications	180W (A.C)	180W (D.C)	
Display Type	-	-	LED
Digital Display	-	-	7 segments
Power Source	220 Volts 50 Hz		
Dimensions	720x490x320mm		
Weight	38 Kgs (Approx.)
