- 3. Hardness Conversion:** Converts HV to other hardness scales (HRA, HRB, HRC, HBW, HK, etc.)

- 4. Data remember / Store function:** All data in the process of measurement will be saved in the right bottom sheet.
- 5. Statistics:** Automatically updates the statistical values such as average, min and max, standard deviation.
- 6. Test report:** Automatically generates WORD report with customizable template.

- 7. Data archiving:** Measurement data and images can be saved in one file for later retrieval.
- 8. Knoop Scale:** Can be configured for Knoop Scale measurement.

- 9. Other Functions:** Includes the basic functions of imaging system such as image capture, camera calibration, image processing, etc.
